SUMMARY

I am a third-year B.Tech student with experience in web development using HTML, CSS, Wix, and WordPress. I have strong communication skills, a quick learning ability, and a basic understanding of Python and JavaScript. I'm eager to expand my technical expertise and contribute to team success through creativity and problem-solving.

WORK EXPERIENCE

ELAMIGO MARCH 2025 - APRIL 2025
WORDPRESS DEVELOPER INTERN

- Developed and personalized WordPress websites for client projects.
 - Key Projects:
 - [NexSchool](#)
 - Designed Contact Us, Testimonials, and Disclaimer pages.
 - Improved Header and Footer for better navigation.
 - [Maa Nritya Yoga](#)

 - [Shreen Gupta Makeup Artist](#)
 - Built Contact Us and Portfolio pages.
 - Gained expertise in WordPress theme customization and responsive design.
- Worked with design and content teams to create user-friendly, SEO-optimized websites.

PROJECTS

AIKYAM

During the Aviothic 1.0 Hackathon at the Kanpur Institute of Technology, I created a prototype for the Aikyam NGO website, which focuses on supporting children and the elderly. I oversaw both the design and development using Wix, crafting a user-friendly interface with features like volunteer registration, donation options, and event management. The responsive design ensures accessibility across various devices, providing a smooth experience for visitors engaging with the NGO's mission.

Explore the live prototype here: [Visit AIKYAM Website](#)

READING ROOM

This e-book platform, developed by Tejas Khandelwal, serves as a prototype aimed at delivering an interactive digital reading experience. It offers easy access to content through an intuitive interface and highlights the potential for data collection and form submissions. This project showcases Tejas's talent for creating an accessible and scalable solution for dynamic user engagement.
